TECHNICAL SKILLS

- **Programming Languages:** Java, Python, Javascript, Typescript, HTML, CSS, C++/C
- **Frameworks & Libraries:** React, Spring Framework, FastAPI, LangGraph, OpenAI, PyTorch
- **Cloud & DevOps:** AWS (ECS, Fargate), Docker, Kubernetes, GCP, Git, Jenkins
- **Databases:** SQL, PostgreSQL, Redis

EXPERIENCE

- **Intuit Inc.** **July 2021 – Present**
Software Engineer - Quickbooks Expert Org *Mountain View, CA*
 - Implemented a LLM Service with LangFuse Observability to reduce the prompt testing time by 20%.
 - Implemented a Active-passive failover for the eventing with multi-region, reducing disaster recovery time from hours to minutes.
 - Designed Tool calling Agentic Service using LangGraph Framework to support automatic onboarding of client by using PDF file.
 - Built Jenkins CI/CD pipeline dashboards that improved developer productivity by 25% and reduced deployment failures by 40%, providing real-time visibility into business-critical metrics.
 - Developed high-performance REST APIs using Java Spring Framework for real-time user engagement validation, resulting in 30% reduction in service latency and successful deprecation of legacy service dependencies
- **Amazon.com Services LLC.** **July 2020 – June 2021**
Software Development Engineer - Payment Risk *Bellevue, WA*
 - Engineered asynchronous email notification system using AWS Simple Workflow (SWF), implementing event-driven architecture that improved email deliverability to marketplace participants by 15% YoY.
 - Designed and deployed Seller Central Onboarding the Card for the Chargebacks which uses the AWS ECS Fargate improving the auto-scaling for the peak time.
 - Optimized infrastructure-as-code (IaC) implementation using AWS Cloud Development Kit (CDK), reducing container resource utilization by 20% across microservices while improving deployment reliability.
 - Implemented the new APIs to get the Customer Order Data which deprecates the old downstream service call, which results in better flexibility and increased data encapsulation.
- **Moxi Platform Inc.** **July 2019 – Jan 2020**
Software Developer Co-op *Syracuse, NY*
 - Containerized development environment using Docker and Docker Compose, implementing CI/CD automation that reduced environment setup time by 70% and eliminated "works on my machine" issues.
 - Developed Python Flask microservices with SQLAlchemy ORM for secure dealer data access, implementing JWT authentication and API rate limiting for DealerVault integration.
 - Built responsive search component using Angular, improving dealership customer lookup speed by 60% and increasing user satisfaction metrics.

PROJECTS

- **Hate Speech Detection In Twitter using Natural Language Processing:**
 - Designed and implemented a system which can fetch all the negative tweets for a particular user or hashtag.
 - Used a Tf-Idf and count vectorizer for feature extraction of the tweets.
 - Deployed a Hate speech detection with three classifier Multinomial Naive Byes, Support Vector Machines and Logical Regression to expose negative tweets.

EDUCATION

- **Syracuse University** **Aug 2018 – May 2020**
Master of Science in Computer Science; GPA: 3.55 *Syracuse, NY*
- **Gujarat Technological University** **Sept 2014 – May 2018**
Bachelor of Engineering in Computer Engineering; GPA: 3.66 (8.87/10.0) *Ahmedabad, India*
